Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see <https://quarto.org>.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).

Voici une explication pour chaque commande Git utilisée :

1. on a d'abord forké le fichier fas_1001 et on lui a changé le nom.

2. **git clone**

Clone le dépôt distant depuis GitHub vers mon répertoire local.

3. **git branch fas_1001_chibani**

Crée une nouvelle branche nommée "fas_1001_chibani".

4. **git checkout fas_1001_chibani**

Change de branche pour "fas_1001_chibani".

5. **git add fas_1001_chibani**

Ajoute les modifications dans le répertoire "fas_1001_chibani".

6. **git commit -m "Premier commit"**

Enregistre les modifications dans la branche actuelle avec un message de commit spécifique.

7. **git log**

Affiche l'historique des commits dans la branche.

8. **git add .**

Ajoute toutes les modifications (dans le répertoire actuel).

9. **git commit -m "Création du document du travail de session"**

Enregistre les modifications avec un message de commit spécifique.

10. **git log**

Affiche l'historique des commits mis à jour après le dernier commit.
